RURALITIC

RURAL REVIVAL,
A LIFE IN THE INSPIRATIONAL
COUNTRYSIDE

What is PopFlows about and why it matters?

Understanding where people move and what it means for European territories

PopFlows is the European Residential Mobility Data Platform developed within the RURALITIC project. Bringing together harmonised data, indicators, and interactive visualisations, this platform helps understand mobility in rural and intermediate areas.

Wide range of data

- Multiple data sources
- Harmonised and comparable indicators
- Multiple years and territorial levels
- High data quality and transparency

Who is it for?

- **Policymakers**
- **Researchers**
- **Local actors**
- **Citizens**

Coverage

10 European countries

Multiple territorial levels (local, regional and national)

Multiple years to analyse trends

Find these answers with PopFlows

- Which territories are gaining or losing residents?
- Where do newcomers come from, and where do leavers go?
- How have these flows changed over time?
- How do rural and intermediate areas compare across Europe?

Key features

- **Territories** – population intensities, inflows, outflows and mobility balances across territorial levels
- **Trajectories** – residential mobility between territories
- **Statistics** – temporal dynamics and comparative analysis
